Changes for 2024 undergraduate applications

Gender question

We are introducing two additional responses to the gender question:

- 'I prefer not to say'
- 'I use another term'

Application fee

The fee for all 2024 undergraduate applications will be £27.50.

References will have 3 structured sections

Enabling universities and colleges to find information easily, to make selection decisions and target support.

Reference roundup

- [Reference examples](#) for each section.
- A [reference guidance presentation](#) which can be downloaded and edited
- [FAQs](#) for each section.
- Watch our [references deep dive sessions](#)
- Advice from admissions officers in a shareable video.

Enter a general statement about your school/college/centre.

If applicable, enter any information about extenuating circumstances which may have impacted the applicant's education and achievement.

Outline any other supportive information specific to the applicant and relevant to the course(s) applied for that you think universities/colleges should be aware of.

[UCAS.COM/ADVISERS/REFERENCES](https://ucas.com/advisers/references)

Three section approach

Enter a general statement about your school/college/centre.
(mandatory for applications sent via a registered centre)

Enter any information about extenuating circumstances which may affect this applicant's performance in examinations or other assessments
(optional)

Use this section to outline any other circumstances specific to the applicant that you think universities/colleges should be aware of, or how they can support the applicant
(optional)

Section 1: Enter a general statement about your school/college/centre.

Information could include:

- context of your school, college or centre, e.g. performance, intake demographics, progression rates to higher education etc.
- your portfolio of qualification provision and any restrictions on options students may have
- information about your school, college or centre which may affect performance, such as significant staff changes, or damage to buildings
- any policies or processes used for predicting grades (e.g. internal assessments). This is an opportunity to articulate any policy about not predicting grades for qualifications where the school or college feels the assessment method or qualification structure is not suited to predictions

Section 2: If applicable, enter any information about extenuating circumstances which may have impacted the applicant's education and achievement.

Include relevant information that contextualises the educational journey, for example:

- individual circumstances – e.g. mature student, disability, serious, acute, or chronic illness, bereavement, significant adverse personal circumstances (with applicant consent)
- context as to why there is a disparity between an individual's grades achieved throughout the school or college (e.g. at GCSE/Scottish National 4/5 equivalent and predicted grades, where applicable)
- factors which have limited the individual's choice of subjects or load of study at UK Level 3 or equivalent (factors which have affected the whole centre rather than the individual should be included in section 1)
- support the university or college should consider putting in place to ensure the applicant can thrive on their course (with applicant's consent) – e.g. highlight the measures the school, college or centre put in place to ensure the student's inclusion/experience

You must be clear whether any of the circumstances outlined in section 2 have already been considered by the student's examination boards or awarding organisations for the qualifications taken.

Section 3 : Outline any other supportive information specific to the applicant and relevant to the course(s) applied for that you think universities/colleges should be aware of.

It is not necessary to craft the perfect paragraph here; providing short, clear, factual statements helps universities and colleges digest the information.

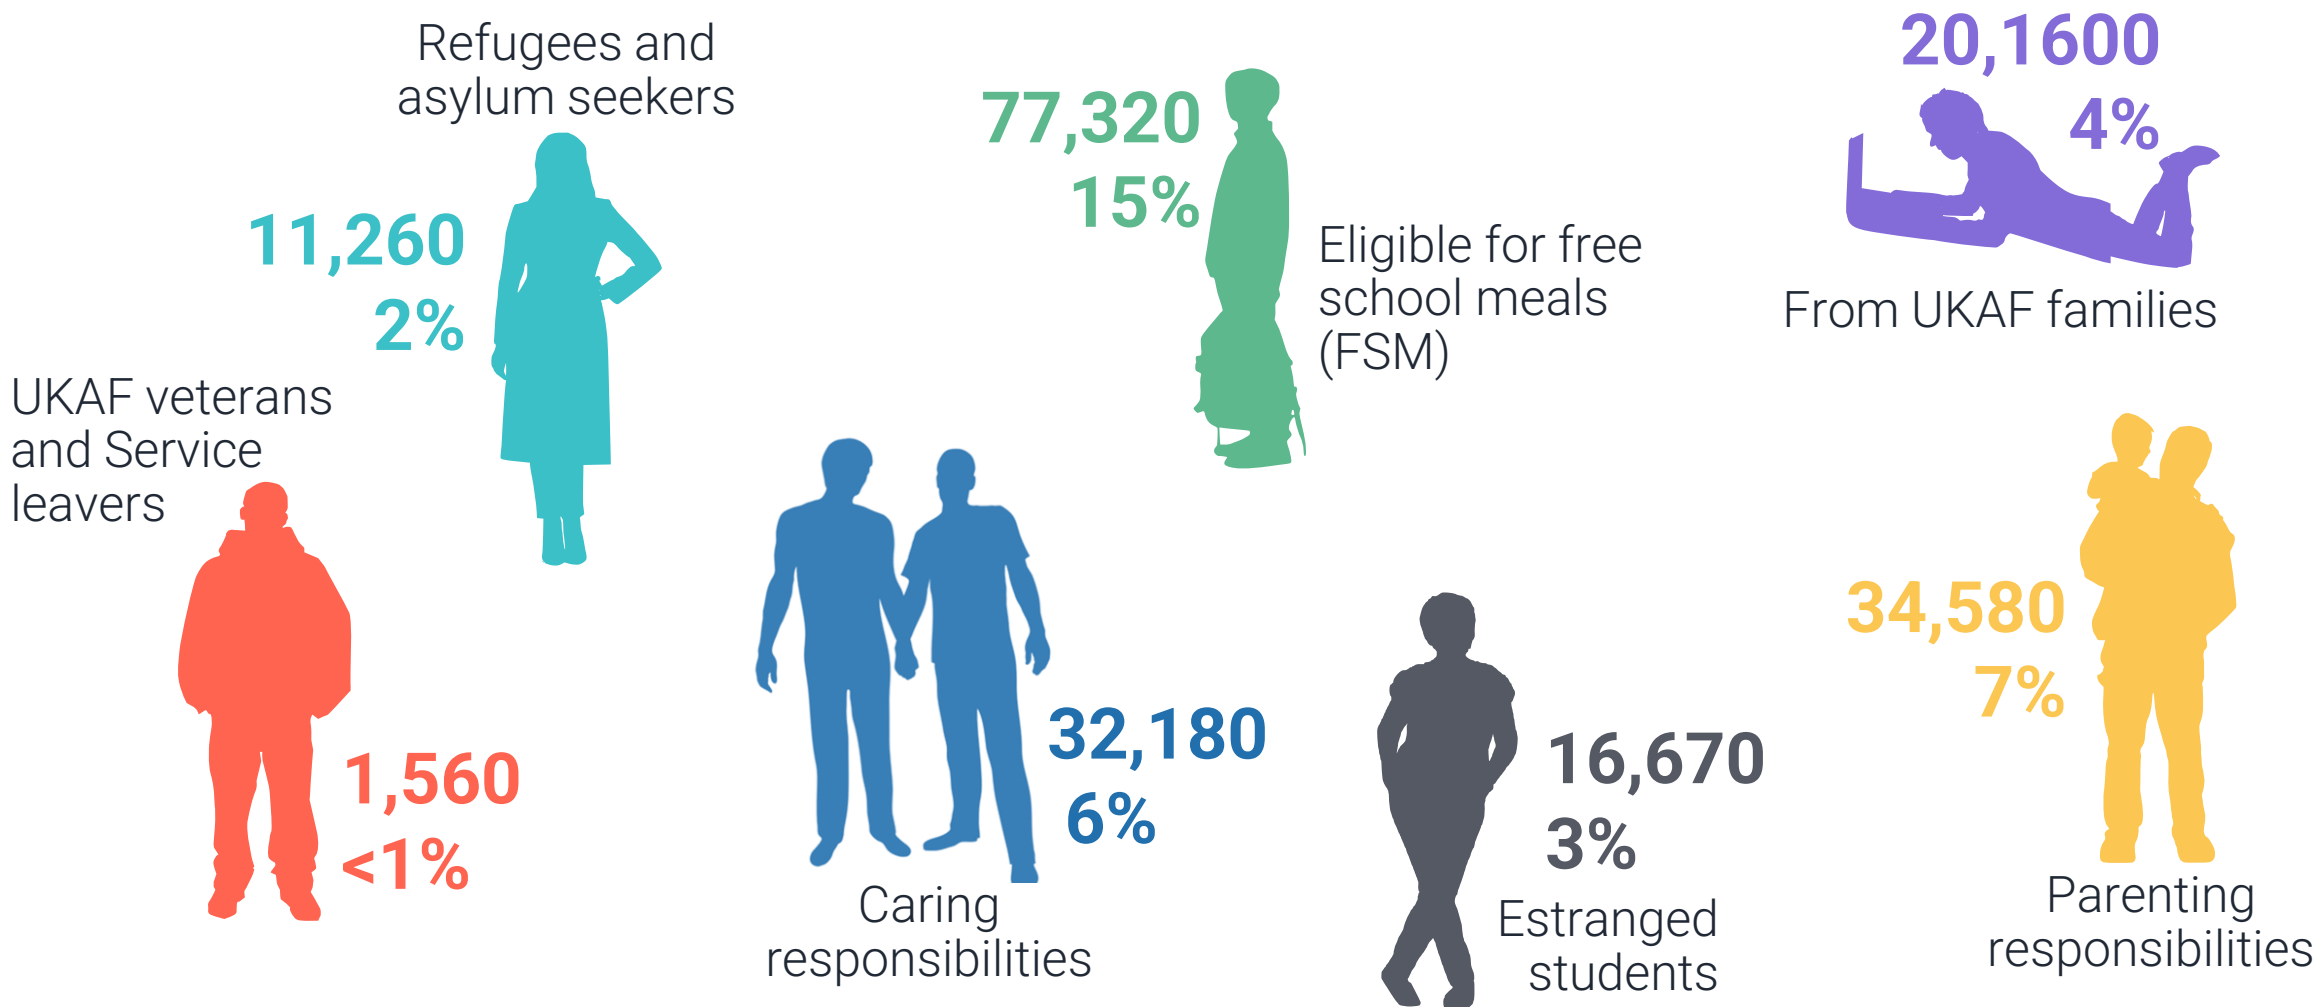

Useful information could include:

- evidence of suitability for the course(s) applied for which may include performance and academic ability in relevant UK Level 3 or equivalent qualifications, relevant work experience, cases where an applicant is the strongest performer in their cohort, or extracurricular achievements
- any barriers the applicant has faced in accessing work experience opportunities, only where relevant to the course applied to

ADVISER TOOLKIT: SUPPORTING STUDENTS WITH INDIVIDUAL NEEDS

Explore this section ▾

For some students, their individual circumstances can have a significant impact on their decision to go to university or college – and on their experience when they are there.

To make sure all your students feel informed and prepared at each stage of their application journey, we've worked with expert organisations to bring together practical tips and useful resources for those who are advising students about their next step.

In this guide, you will find practical information on how to support the following groups:

- 1 Disabled students (including long-term illnesses and learning differences)
- 2 Students with mental health conditions
- 3 Care-experienced students
- 4 Students estranged from their parents
- 5 Refugees and asylum seekers
- 6 Students with caring responsibilities
- 7 Students with parenting responsibilities
- 8 Children from UK Armed Forces families (Service children)
- 9 UK Armed Forces veterans and Service leavers

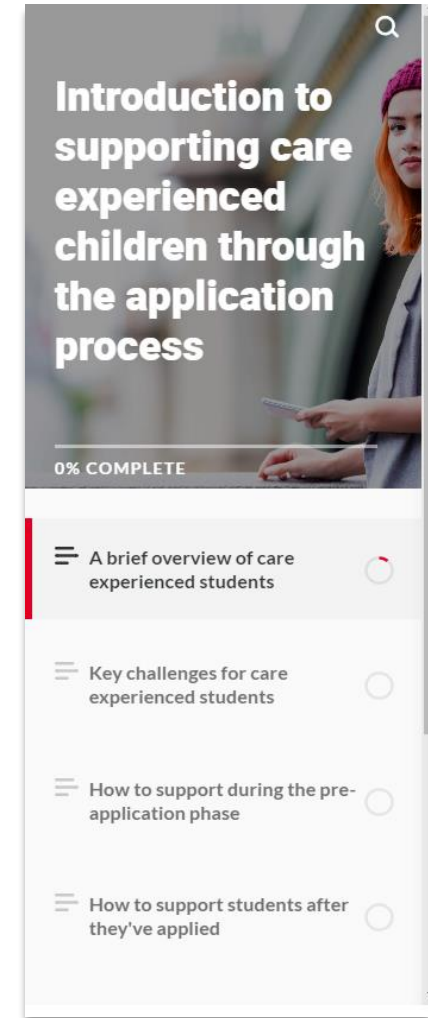

Advertisements for University of London and Nottingham University are visible on the right side of the page.

Students with individual support needs toolkit

For some students, their individual circumstances can have a significant impact on their decision to go to university or college – and on their ability to succeed when they are there. To make sure they're aware of the range of support available, we've pulled together some tips and key resources for you to share with them throughout the different stages of the application process.

0% COMPLETE

- A brief overview of care experienced students
- Key challenges for care experienced students
- How to support during the pre-application phase
- How to support students after they've applied

Personal Statement

Reform update

- Following extensive consultation on personal statements across all audiences, the **final themes will be developed for delivery in 2025 for 2026 entry.**
- The student voice is at the heart of the reform with 89% of students saying they feel the purpose of the statement is clear.
- By framing the statement as a series of free-text questions UCAS aims to offer more support for students who feel it is currently a stressful process.
