What do we know about the 2026 cohort?

Make your predictions...

What's most important to the 2026 cohort?

Can you predict the common themes and popular subjects that 2026 entry students are talking about?

**slido.com
#2115 824**

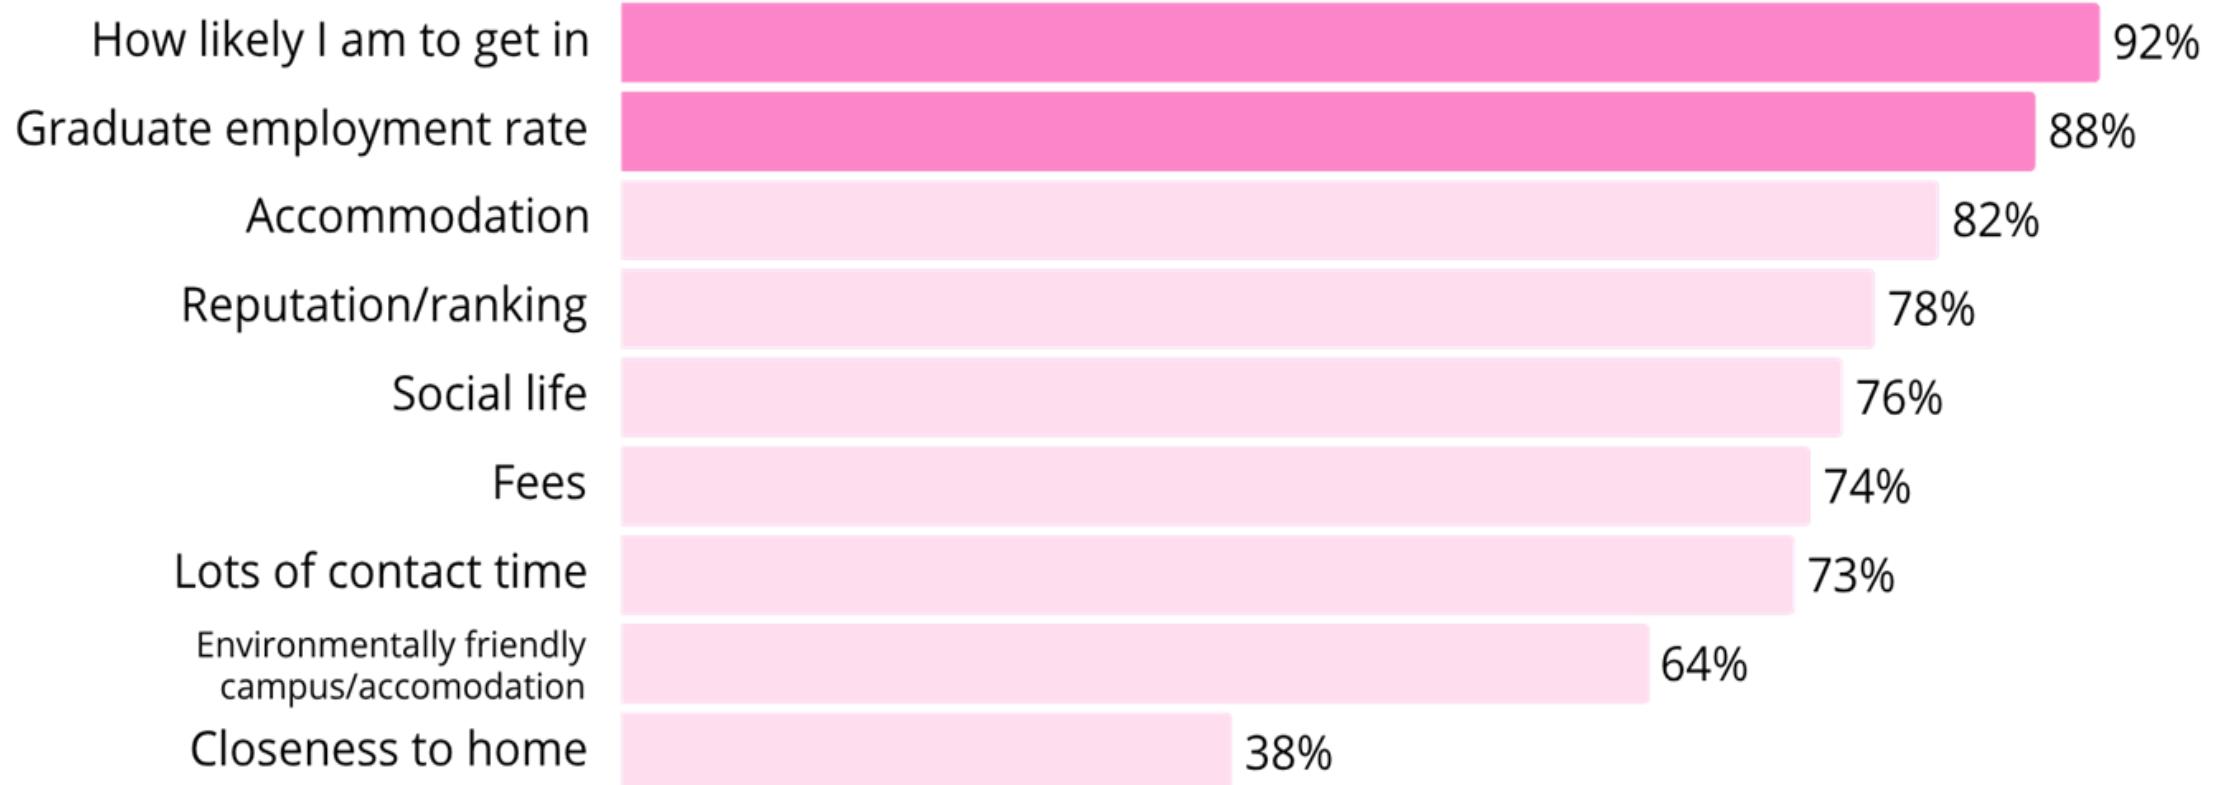

What do you think is most important to the 2026 cohort?

Key considerations for the 2026 cohort

Factors rated 'important' or 'very important' when choosing a university

Employment sits near the top

Graduate employment rate is one of the **top two factors** students consider when deciding their next steps.

49% of A-level students said their decision-making was largely influenced by career prospects.

Yet, university communications tend to place **less emphasis** on **career prospects** than on factors like social life, location, or reputation.

Prospects' "Early Careers" 2024 survey

Explaining the data

Unifrog's **UK university tool** is where students select their preferred courses and universities, placing them into a 'shortlist' of options.

Connecting subjects to careers

Explaining the data

Subject and Career library guides are **short online guides** that help students understand what studying a subject or working in a career involves, and where it can lead.

The screenshot shows the unifrog Subjects library. At the top, there is a navigation bar with links for HOME, FAVOURITES, LOCKER, APPLY, HELP, a search icon, a gear icon, an envelope icon, and a SIGN OUT button. Below this, there are three numbered buttons: 1 Start, 2 Longlist, and 3 Profile. The main content area is titled "Subjects library" and contains the sub-section "Find the best subjects for you, then save your favourites here:". It features three video thumbnails with play buttons in the center. The first thumbnail is for "Building surveying and Construction" featuring a woman in a black top. The second is for "Materials science" featuring a woman in a white lab coat. The third is for "Criminology" featuring a man in a blue hoodie. Each thumbnail has a title, a brief description, and a "Read the guide" button.

The screenshot shows the unifrog Careers library. The layout is identical to the Subjects library, with a top navigation bar, numbered buttons (1 Start, 2 Longlist, 3 Profile), and a main content area titled "Careers library" with the sub-section "Find the best careers for you, then save your favourites here:". It features three video thumbnails with play buttons in the center. The first thumbnail is for "Barrister" featuring a woman in a black dress. The second is for "Accounting technician" featuring a woman in a dark top. The third is for "Security Service officer" featuring a person in a control room. Each thumbnail has a title, a brief description, and a "Read the profile" button.

Subjects library

Find the best subjects for you, then save your favourites here:

Building surveying and Construction

The design, planning, construction, and restoration of buildings.

[Read the guide](#)

Materials science

The study of the structure, properties, and uses of new and existing materials.

[Read the guide](#)

Criminology

Criminology is a social science that focuses on the study of crimes and their causes, effects, and social impact.

[Read the guide](#)

Careers library

Find the best careers for you, then save your favourites here:

Barrister

Barristers give specialist legal advice and represent people in court. In some countries, there is no separation between this and the Solicitor role.

[Read the profile](#)

Accounting technician

Accounting technicians manage the financial side of a company or charity.

[Read the profile](#)

Security Service officer

Security Service officers are the UK's domestic version of Intelligence officers – they conduct intelligence activities for the internal security of the country.

Applying what you know

Connecting subjects and careers: forensics

Turn your curiosity into a career in forensics For students

Forensic investigation isn't just about crime scenes and fingerprints – it's a fascinating, multidisciplinary topic that shapes how we uncover facts and truth. Join Professor Claire Gwinnett from the University of Staffordshire as she reveals how studying forensic science will equip you with skills to investigate hidden evidence, contribute to research, and tackle challenges that matter globally. If you're curious about science, justice, or problem-solving, forensics could be an exciting career.

Connecting subjects and careers: business

The future of work 2030: how to develop high impact "un-LLM-able" skills For students

Large Language Models (LLMs) such as ChatGPT are radically changing how work is carried out in many industries, and having a dramatic impact on graduate recruitment. Join Professor Stephen Todd (UCL School of Management) to explore how you can develop high impact skills that AI can't replicate. He'll also share key ideas and ways of thinking from business, engineering, and art and design which can help you build the deep foundations you need to succeed in a post-LLM world.

Connecting subjects and careers: law

Where can a law degree take you? For students

A law degree opens doors far beyond the courtroom. Whether you're interested in practising as a solicitor or barrister, pursuing opportunities in business, government, or international organisations, or applying your skills in unexpected sectors, the possibilities are wide-ranging. Join Kirsty McDougall, a lecturer in law at the University of Southampton, for an insightful webinar exploring the diverse career paths available to law graduates.

Connecting subjects and careers: psychology

What's it really like to be a clinical psychologist? For students

Join the University of Hull for a rare opportunity to hear first-hand from a practising clinical psychologist about the training pathways, the highs and challenges of the job, and what makes this career so rewarding and fulfilling. You'll also discover Hull's fast-track training programme, which comprises a degree in psychology and a fully-funded doctorate that pays you an NHS salary whilst you train! Ideal if you're thinking about working in healthcare, forensics, or psychology.

Connecting subjects and careers: healthcare

Healthcare: master your application and find your dream role For students

Join this webinar from the University of Southampton to learn more about a career in healthcare. You'll learn how to prepare for a healthcare application, including tips for gaining work experience and the skills universities are looking for. We'll also explore the range of roles available across the healthcare profession, like occupational therapy, nursing, midwifery, and physiotherapy, to help you decide which one is the best fit for you.

What did **students** have to say?

“The amount of detail about the job and showing the side and **jobs** of forensics science **people likely forget about** or are not aware.

I enjoyed learning about the **alternative law careers** that some I did not expect, which was very interesting.

I found it really interesting and opened up a **career pathway** I didn't know about before.

I really enjoyed how in depth it was and how it gave me **more reassurance on what career paths** I could go down if I were to take a Criminology degree.

I enjoyed that the session fully explained what it means to be a biomedical scientist and **what it's like day to day** so I can understand more about the job.

I really enjoyed hearing about **the student successes**, as they were really inspirational and gave me an idea of how to **develop creative skills** into a job.

Discussion time!
